

As you walk the NAB show floor or check proposed solutions on the web, beware of custom bespoke architectures using proprietary solutions (e.g., all Intel, all NVIDIA, all AMD). Each company has its demos that showcase technology but not operational competitiveness. None of these systems meet the OPEX or CAPEX needed for a competitive and profitable cloud gaming solution.

Let us help you - [netint.biz/Talk\\_w\\_NETINT\\_Experts](https://netint.biz/Talk_w_NETINT_Experts)

	CPU	GPU	VPU	Total Cost	Total Watts	720p Outputs	Cost/ Stream	Watts/ Stream
NETINT solution (from inhouse testing)	AMD EPYC 7763 64C 2.45GHz CPU	AMD Radeon PRO V620	2 Quadra T2A	\$10,664	660	200	\$51	3.3
